

A note on the abridged version

Foreign readers of the Annual Report will find that the present translation is only a broader annotation of the full Annual Report of the Czech School Inspectorate for the school year 2014/2015. This annotation, however, contains all basic statistical data on the various stages of education and an overview of the findings of the Czech School Inspectorate during the given period, including the proposed recommendations.

If you are interested in more information, please contact the office of the Deputy Chief School Inspector
