

4. krok → Zvolte umístění a název výstupu

The screenshot shows the 'IEA IDB Analyzer: Analysis Module - (Version 3.1.25)' window. The 'Output Files' field at the bottom is highlighted with a red box. The window contains several sections: 'Analysis File', 'Analysis Type' (ICILS (Using Teacher Weights)), 'Statistic Type' (Percentages only), 'Number of Decimals' (2), 'Select Variables' (with a table listing variables like IT1G16A), 'Grouping Variables' (including IDCNTY and IT1G06A), and 'Weight Variable' (TOTWGTT). A 'Start SPSS' button is visible at the bottom right.

Název složky, kam je soubor uložen (vč. podsložek), ani název souboru **nesmí obsahovat diakritiku**.

5. krok → Spusťte SPSS

This screenshot is identical to the previous one, showing the same software interface. The 'Start SPSS' button at the bottom center is now highlighted with a red circle, indicating the next step in the process.

IDB Analyzer spustí SPSS a automaticky otevře syntax. SPSS syntaxový soubor se tímto uloží do zvolené složky.
